LATEX for Linguists

LATEX 3: Graphics, tables & floats

Sebastian Nordhoff & Antonio Machicao y Priemer www.linguistik.hu-berlin.de/staff/amyp

LOT 2019, Amsterdam

January 16, 2019

Contents

- Graphics
 - Including a graphic
 - Rescaling the graphic
 - Formats and paths
- 2 Tables
- Floating environments
- 4 List of figures and list of tables

- **1** Graphics
- 2 Tables
- Floating environments
- 4 List of figures and list of tables

Including a graphic

- Load the package graphicx: \usepackage{graphicx}
- To include the graphic, use the following command (file ending, i.e. .pdf, doesn't need to be added):

\includegraphics[size of graphic]{path/name of graphic}

Rescaling the graphic

Rescaling **relative** to the **original size** with the option scale (scale=0.5 = 50% of the original size)

\includegraphics[scale=0.5]{komposita}

Rescaling the graphic

Rescaling with absolute specification

\includegraphics[width=2.5cm] {komposita}
\includegraphics[height=2.5cm] {komposita}

Rescaling relative to the document size

\includegraphics[width=\linewidth] {komposita}
\includegraphics[width=.2\linewidth] {komposita}
\includegraphics[width=.2\textwidth] {komposita}

Formats and paths

- The following **formats** can be used with XeLATEX and PDFLATEX:
 - .pdf (vector graphics)
 - .png (raster graphics)
 - .jpg (raster graphics)
 - .eps (vector graphics) (in XelATEX or with epstopdf package in PDFLATEX)
- You must specify the place where you have saved the graphic starting from the location of your .tex-file.
 - Graphic and .tex-file are in the same folder:
 - \includegraphics{komposita}
 - Graphic is in a folder graphics. This folder is in the same folder as your .tex-file:
 - \includegraphics{graphics/komposita}
 - .tex-file is in a folder. This folder and your graphic are in the same folder: \includegraphics{../komposita}

Exercise

Go to

https://github.com/langsci/latex4linguists/blob/master/2-1.md and follow the instructions of the first **three blocks** in your .tex file.

- Graphics
- 2 Tables
- Floating environments
- 4 List of figures and list of tables

Tables

- environment for tables: tabular
- optional argument for **position** of table
- obligatory argument for layout inside a column
- separation of table cells: &
- End of a row: \\

Example:

```
sample text
\begin{tabular}[t]{1|c|r}
0001 & 002 & 03 \\
\hline
0A & 000B & 00C \\
\hline
00i & 0ii & 000iii \\
\end{tabular}
```

sample text	0001	002	03
	0A	000B	00C
•	00i	0ii	000iii

- possible values for the **obligatory argument**: 1 (left), c (centered), r (right), p{length} (fixed width), optionally I (pipe, for vertical lines between columns)
- each column must have an alignment specification (i.e. 1, c, r, or p)

```
\begin{tabular}[t]{lc|r|p{1.5cm}}
00001 & 002 & 03 & 0004 \\
\hline
0A & 000B & 00C & 0000D\\
\hline
00i & 0000ii & 000iii & iv\\
\end{tabular}
```

00001	002	03	0004
0A	000B	00C	0000D
00i	0000ii	000iii	iv

- Graphics
- 2 Tables
- Floating environments
- 4 List of figures and list of tables

Floating environments

With floating environments, LATEX puts figures or tables in the best position to avoid gaps in the layout.

```
It is not necessary that this text has
any meaning.
\begin{table}[htb]
\centering
\begin{tabular}[t]{1|1}
Eins & Zwei \\
\hline
Drei & Vier \\
\end{tabular}
\caption{Caption of my table}
\label{fig:TableFloat}
\end{table}
```

It is not necessary that this text has any meaning.

Eins	Zwei
Drei	Vier

Table 1: Caption of my table

- floating environment for tables: table
- floating environment for figures: figure
- In these environments, the command \caption{ } can be used.
- Optionally, preferences for the position can be given: h (here), t (top),
 b (bottom), p (extra page for floats).
- In the environment, you can specify the position of the figure/table (e.g. \centering).

```
\begin{figure}[htb]
\centering
\includegraphics{komposita}
\caption{My first float}
\label{fig:FigFloat}
\end{figure}
```

Fig. 1: My first float

- Graphics
 - Including a graphic
 - Rescaling the graphic
 - Formats and paths
- 2 Tables
- Floating environments
- 4 List of figures and list of tables

List of figures and list of tables

With the following commands, a list of figures or a list of tables is automatically generated:

- \listoffigures
- \listoftables

Put these commands where your list of figures or tables should appear.

LATEX collects the information from your captions for the lists.

Exercise

Go to

https://github.com/langsci/latex4linguists/blob/master/2-1.md and follow the instructions of **all blocks** in your .tex file.
