1 Playing with headlines and paragraphs

This is my first LaTeX file.

This an example with a word in **bold**. This an example with a word in *italics*.

<div align="center">This sentence is centered.</div>

This sentence is not centered.

This sentence has a huge word. This sentence is in normal size.

1.1 My first subsection

This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using. This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

1.1.1 My first subsubsection

This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using. This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

1.2 My second subsection

This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using. This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

1.2.1 My second subsubsection

This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using. This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

1.3 Playing with paragraphs and line brakes

This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

This text is **not indented**. This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

This text is **not indented**. This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

My first paragraph This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

My first subparagraph This is a sample text. The only purpose of this text is to show how to work with LaTeX. It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

2 Playing with footnotes

This is a sample text. The only purpose of this text[1] is to show how to work with footnotes in LaTeX.[2] It is not necessary that this text has any meaning. It should only show some properties of the system we are using.

---

[1] A text (literary theory) is any object that can be read.
[2] LaTeX is a document preparation system.
